Use-Case Specification: Rating and Reviewing Computer

1. Rating and Reviewing Computer

1.1 Brief Description

This use case defines the steps of rating and reviewing computers on the computer shop's website.
Customer can easily rate and/or review the computers after they have read.

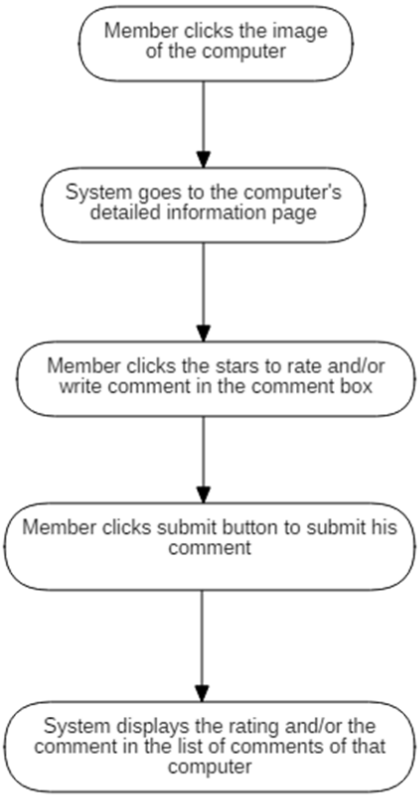
1.2 Actor

Member.

2. Flow of Events

2.1 Basic Flow

Member clicks the image of the computer to go to the detailed information page of that computer. Member clicks the stars to rate the computer and/or click the comment box to write comments on the computer. There are five stars for the member to rate a computer. If member wants to write comment, member clicks the submit button to submit his comment after having finished with it. Eventually, the system display the rating and/or the comment in the list of the comments of that computer.



Basic flow of Rating and Reviewing Computer
